

Technical Data Sheet: ZDP8053

Double Sided PET Tape

ZDP8053 is a transparent double sided tape consist of PET as carrier and coated with acrylic adhesive on both sides. This product provides excellent adhesion to smooth surfaces and superior die-cut ability as well as processing performance. It is used to mounting of mobile assembly such as backlight module of LCD display, metal frame and much more.

Characteristics

- Excellent adhesion and holding power
- Excellent die-cutting performance and temperature resistance
- Good bonding effect on different plastic films, hardware or painted plate

Applications

- Suitable to be used for mounting module and metal frame
- Also used for mounting in mobile phones, digital components and decorative parts in furniture and metal sheets

Properties

Properties	ZDP8053
Tape Colour	Transparent
Tape Thickness (μm)	50
180° Peel Adhesion to Steel (dwell 30mins) (N/25mm)	≥ 8
Static Shearing (1000g, 25mm x 25mm) (min)	≥ 1440
Temperature Resistance (°C)	100
