

Technical Data Sheet: ZDT8105

Double Sided Tissue Tape

ZDT8105 is a double-sided adhesive tape which are specially design for bonding of paperboard, foam, felt and nameplate application. Double-sided adhesive tape is impregnated with a tackified pressure-sensitive adhesive on the flexible tissue, laminated on dimensional stable PEK liner.

Characteristics

- Very good adhesion level on various kinds of plastic materials, foams and metal surfaces
- Very good repulsion resistance and prevents lifting of curvature portion
- Very good adhesion on paper board
- Excellent temperature & heat resistance
- Dimensional stable liner provides excellent workability for full or half cut, during die cut process

Applications

- Paper box closure
- Mounting of plastic and foam parts for E&E and automotive industries
- Lamination of Polyurethane foams, Polyethylene foams, felts, rubber and etc
- Lamination of nameplates for Electrical & Electronic Appliances

Properties

Properties	ZDT8105	Standard
Tape Thickness (µm)	100	ASTM D1000
Peel Adhesion on Steel (N/in)	15	GB/T2792-1998
Holding Power (25°C) (Hrs)	7	GB/T4851-1998
