

Technical Data Sheet: ZSI8150

Single Sided Polyimide Tape

ZSI8150 is a high temperature resistant single-sided pressure-sensitive tape with polyimide film as the base material and coated with acrylic adhesive.

Characteristics

- High temperature resistance up to 200°C

Applications

- Suitable to be used for PCB board gold finger shielding protection
- Suitable also for high temperature masking

Properties

Properties	ZSI8150	Standard
Tape Colour	Amber	-
Tape Thickness (µm)	150	-
Peel Adhesion on Steel (N/25mm)	> 4.6	PSTC-101
Elongation at Break (%)	> 50	PSTC-31
Tensile Strength (N/25mm)	> 110	PSTC-31
Temperature Resistance- Short Term (°C)	200	-
Dielectric Breakdown Voltage (kV)	> 4.0	PSTC-51
