

Technical Data Sheet: ZSI9055

Single Sided Polyimide Tape

ZSI9055 is a high temperature resistant single-sided tape with polyimide film as the substrate and coated with silicone adhesive.

Characteristics

- High temperature resistance
- Anti-static polyimide tape

Applications

- Suitable to be used for PCB board masking, insulation protection and shielding application
- Suitable also for high temperature masking and surface-mount technology

Properties

Properties	ZSI9055
Tape Colour	Amber
Tape Thickness (μm)	55
Peel Adhesion on Steel (kg/25mm)	4.6
Elongation at Break (%)	60
Tensile Strength (kg/25mm)	13
Anti-static Index	$10^6 \sim 10^8$
Withstand Voltage (kV)	5.0
Insulation Class	F
