

Technical Data Sheet: ZSP8060

Single Sided PET Tape

ZSP8060 is a single-sided protective film consisting of transparent PET as carrier film coated with acrylic pressure sensitive adhesive, with a total thickness of 62 μ m, not applied to protection of diffusion sheet, brightness enhancement film and reflective film etc. optical material and their manufacturing process.

Characteristics

- Smooth and flat surface
- Suitable for adhesion of wide range materials

Applications

- Suitable for die-cutting waste discharge to wear prevention and reduce damage

Properties

Properties	ZSP8060	Standard
Tape Thickness (μ m)	62	GB/T7125-2014
180° Peel Adhesion to Steel (20mins dwell) (gf/24mm)	50 ~ 100	GB/T2792-2014
